

DvP Atomic Settlement Playbook

Operations Playbooks · Published by UnyKorn LLC (Wyoming), technology provider · September 2026

DEMONSTRATION DOCUMENT — NOT AN OFFERING, NOT A BOUND CONTRACT. All entities, identifiers, reserves, serials, vaults, policies, counterparties and figures in this document are illustrative and synthetic. UnyKorn LLC is not a broker-dealer, exchange, alternative trading system, investment adviser, bank, trust company, qualified custodian, money transmitter, insurer or issuer, and does not hold client assets or funds. No entity described here is registered with the SEC, FINRA, the FCA or any other regulator. No refinery, vault operator, insurer, broker, auditor or qualified person named or implied is a counterparty to UnyKorn LLC. Nothing here is an offer to sell or a solicitation of an offer to buy any security, or investment, legal, tax or accounting advice.

ATOMIC DELIVERY-VERSUS-PAYMENT (DvP) SETTLEMENT PLAYBOOK

Institutional Operational Guide for Bullion Banks, Prime Brokers & OTC Desks

1. The Atomic Settlement Imperative

In traditional bullion markets, settlement is plagued by **Herstatt Risk** (cross-currency cross-timezone settlement failure) and counterparty credit exposures over T+2 to T+5 days. DGX eliminates settlement risk by executing simultaneous delivery and payment on-chain in 1 second.

2. DvP Trade Lifecycle

3. Physical Redemption Option

Any verified institutional holder of DGX tokens may exercise physical redemption: 1. Burn DGX tokens via `dgx_redeemPhysical` contract call. 2. Select delivery method: * **In-Vault Title Transfer**: Re-assign legal title within Zurich Freezone or London vaults (zero transport cost). * **Armored Secure Escort**: Physical armored delivery via an armoured logistics provider to holder's designated depository facility worldwide.
